Mangesh Thakur

Backend Engineer | Java Developer | Spring Boot | Distributed Systems
Hyderabad, India | mangeshthakur321@gmail.com | +91-9008584390 | LinkedIn | GitHub

Summary

Backend Engineer with 3 years of experience building scalable backend systems, distributed applications, and AI-powered platforms using Java, Spring Boot, Python, Kafka, Apache Flink, PostgreSQL, Docker, Kubernetes, Azure, and GCP. Experienced in backend architecture, high-performance REST APIs, CI/CD, production deployments, and latency optimization.

Technical Skills

Languages: Java, Python, SQL
Backend Frameworks: Spring Boot, Django, REST APIs, JWT, Keycloak
Distributed Systems: Kafka, Apache Flink, Async Processing, Multithreading
AI & LLM Tools: OpenAI, Claude, Copilot Studio, RAG, ChromaDB
Databases & Cloud: PostgreSQL, Redis, Docker, Kubernetes, AKS, GCP, Cloud Run, Cloud SQL

Experience

VassarLabs IT Solutions Jan 2023 – Present
Backend Engineer *Hyderabad, India*

- **Southwire (AI-Powered Financial Analytics Platform):** Led backend implementation from POC to production. Owned API design, document pipelines, code reviews, CI/CD, and deployments. Built 15+ async APIs powering 8 dashboards with ∼90% extraction accuracy. Reduced processing time by 40% using async processing/multithreading. Deployed on AKS and migrated to GCP; platform serves 100+ documents/week.
- **HBL (Real-Time Performance Analysis Platform):** Built Kafka, Apache Flink + Spring Boot pipelines for large-scale log analytics. Improved scalability using LLD optimization, workflow refactoring, and horizontal scaling. Reduced one hour of operational data processing to under 4 minutes.
- **Georgia-Pacific (Enterprise Procurement Platform):** Developed 10+ production REST APIs using Spring Boot, PostgreSQL, and Keycloak. Improved API responsiveness through backend optimization and clean architecture.
- **Connected Enterprise:** Built the complete enterprise email automation workflow from scratch, transforming it into a core platform capability.
- **Phone Solution:** Reduced LLM latency from 900ms to 300–400ms and end-to-end voice latency down to 1.2s.
- **AYG (AI Yacht Discovery Assistant):** Delivered an AI chatbot from POC to production and engineered a Specification Identification Flow.
- **Georgia-Pacific (AI Brief Generation Platform):** Integrated Microsoft Copilot Studio and delivered the AI Brief Generator.

Personal Projects

Developer Platform | *Java, Spring Boot, Microservices*

- Engineered a modular Spring Boot platform incorporating Authentication, Workspace management, Projects, API Key management, and a custom URL Shortener.
- Roadmap features currently in development: Role-Based Access Control (RBAC), Redis Caching, Notification Service, Storage Engine, RAG-based AI Engine, and Developer Marketplace.

Education

Reva University 2019 – 2023
B.Tech in Computer Science & Information Technology (CGPA: 8.17 / 10) *Bengaluru, India*
